(54) STORAGE SUBSYSTEM

(57)Abstract:

PROBLEM TO BE SOLVED: To provide the storage subsystem with a controller which eliminates exclusive control over a cache between plural controllers sharing the cache.

SOLUTION: The cache areas of caches 33 and 43 in which data are written mutually in multiple are divided by processors and the controllers 30 and 40 access only their controller control areas. The cache areas that the controllers use are fixed to eliminate the need for exclusive control between the processors and prevent deterioration in performance due to multiprocessor constitution.

LEGAL STATUS

[Date of request for examination]

31.10.2002

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number]

[Date of registration]

[Number of appeal against examiner's decision of rejection]

[Date of requesting appeal against examiner's
decision of rejection]

[Date of extinction of right]
